Easy ways to create great...

Body Art & Nail Art

This kit contains everything you need to create glittery tattoos on your skin and nails!
Before you begin, make sure your skin and nails are clean, dry and free of oils and make-up.

- Choose which gorgeous design to use and cut it out from the tattoo sheet.
- Peel the transparent film away from its backing and place the design onto your skin or nail in the position you like. Make sure the gluey side is face down.
- Gently press down on the design and rub slowly to allow the gluey effect to transfer onto your skin or nail. Lift away the film and you'll see the slight sheen of the design remain. If you find some of the design doesn't transfer, simply press for longer.
- Now you're ready to sparkle your tattoo! Dip the brush supplied into the glitter colour of your choice and brush the glitter onto the design. You'll notice the glitter being held in place by the glue.
- You can add more depth of colour by using more glitter, or you can mix in other glitter colours for really dazzling results. You can even pick out really small areas to glitter one colour and then other areas in another colour - to create lots of colours in glittery detail.
- The left-over glitter easily brushes away with the brush, or you could use a thick blusher-type brush (not provided).

Adding Gems - For a special sparkle add a glittering gem! Use the tweezers provided to lift the gem and to place it on top of the tattoo - the glue will hold it in position. Then add the glitter around it for a sensational look!

To Remove - Glitza glittery tattoos are waterproof and could remain on your skin for 5 days or so if you don't rub them. But, to remove and change your look, just use warm water and soap or a basic facial toner / baby oil and gently rub them away.
