**20-40X
MAGNIFICATION
AND FOCUSING
CONTROLS**

WARNING! Not suitable for children under 3 years of age. Small parts. Choking hazard. To be used under the direct supervision of an adult.

The purpose of the crossed-out wheeled bin symbol is to remind us that most electrical product and batteries contain trace elements which could be harmful to our environment and therefore our health. We must all be careful to dispose of them responsibly in a specifically designated way – either using a collection scheme or into the correctly labelled civic amenity (NOT into general waste) – this will help your local authority to arrange to recycle or dispose of them in the appropriate manner.

Requires 3 x AG13 Button Cell Batteries (included)

WARNING! Dispose of used batteries immediately. Keep new and used batteries away from children. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

Please retain the information on this manual for future reference.

Colour, designs and decorations may vary from those shown in the photographs.

Printed in China.

AND FOCUS
LEVER

Getting Started

1. Place material to be examined on the slide and insert into the specimen stage. If necessary, secure the specimen with one of the clear stickers, which will hold it flat and prevent it from moving around. You can also place your microscope over larger specimens and look at them directly, without having to mount them on a slide.
2. Press the LED On / Off button.
3. Look through eyepiece and turn the zoom wheel to adjust to the desired degree of magnification.
4. Turn the focusing wheel gradually until the image is sharp.

Battery Installation Adults only

Insert **3 x AG13 (LR44) 1.5 button cell batteries** in the body of the microscope.

You will need a Phillips head (+) screwdriver to remove the battery compartment cover. Make sure they are in the correct polarity.

Replace the battery compartment cover and re-insert the screw. Do not over tighten.

IMPORTANT INFORMATION

Safe Battery Usage

- Only adults should replace batteries.
- Do not mix battery types or old and new batteries.
- Non-rechargeable batteries are not to be recharged.
- Batteries are to be inserted with the correct polarity.
- Do not short-circuit the supply terminals.
- Remove exhausted batteries.
- When not in use, remove batteries to prevent possible leakage.
- Use only recommended or equivalent battery types.
- Do not dispose of batteries in fire: batteries may explode or leak.
